

TEST CASE 1 for TEST PLAN 1

Description:

When the user clicks the 'See All Bots' button, it retrieves bot data with values. The user will be able to click the 'draw button' and the website will respond by retrieving 5 random bots with their values as well as the 'add to duo' button. When the user clicks the 'add to duo' button, the correct bot and values of the bot are placed into 'your duo' vs computer duo selection with the option to 'duel'. If the user clicks the 'remove from duo' on the bot card it will remove that bot and put it back into the draw pile. When the user clicks 'duel' it will duel 'your duo' selection along with the computers. It will have appropriate amounts of wins and losses based off the bot data. When the user clicks play again the website will respond by refreshing the page back to the draw option and see all bots options. The website will properly record 'wins' and 'losses'.

Steps:

1. Visit <http://localhost:8000/> on a modern browser on a desktop machine.
2. Click the 'See All Bots' button
3. Click the 'Draw' button
4. Choose two bots and click their 'add to duo' buttons
5. Click 'Remove from duo' from one of the bots chosen
6. If bot was removed add the bot back by clicking 'add to duo' again on the bot card
7. Click the 'duel' button
8. On that page click the 'See All Bots' button again
9. Click 'Play again'

Test Postconditions:

1. Website should come up when the local host is typed into url
2. When the 'See All Bots' button is clicked website should bring up all bots and their values
3. When the 'draw' button is clicked it should draw 5 random bots with their values on a bot card with a 'add to duo' button
4. When the 'add to duo' button is clicked on the bot card it should add the bot and its values on the card (as well as a remove bot button) to 'your duo' alongside a computer duo.
5. When the 'Remove from duo' button is clicked on any bot it should remove the bot and put it back into the draw pile with all values and buttons.
6. When adding the bot that was removed back to the 'your duo' pile when clicking 'add to duo' again, it should add it back to 'your duo'.
7. When the 'duel button is clicked it should say if the user won or lost and record it.
8. When 'See All Bots' button is clicked on that page the user should be able to see all the bots and their values

9. When 'play again' is clicked the website should refresh back to start page with 'draw' button and 'see all bots' button.
10. It should record the correct amount of wins or losses.
